## INFORMATION DISCLOSURE CITATION EXPLAINING THE RELEVANCE OF EACH LISTED ITEM

The following prior art documents were cited during the proceeding before the Japanese Patent Office.

- 1. JP 10-032557
- 2. JP 05-327807

## **REMARKS**

The attached PTO Form SB/08/A/B is incorporated as part of the Information Disclosure Statement. A copy of each cited document is attached. Applicants submit herewith patents, publications, or other information of which they are aware, which they believe may be material to the examination of this application and in respect of which there may be a duty to disclose in accordance with 37 CFR 1.56.

While this Information Disclosure Statement may be "material" pursuant to 37 CFR 1.56, it is not intended to constitute an admission that any patent, publication, or other information referred to therein is "prior art" for this invention unless specifically designated as such.

In accordance with 37 CFR 1.97(b), the filing of this Information Disclosure Statement shall not be construed to mean that a search has been made or that no other material information as defined in 37 CFR 1.56(a) exists.

The following prior art documents were cited during the proceeding before the Japanese Patent Office.

JP 10-032557 describes a relay system in which a distance between a transmitter and a repeater is extended or a period of a guard interval being redundant period is reduced so as to increase transmission capacity and a transmitter and a repeater used for the same.

JP 05-327807 describes a system to provide transmission reception system in which a problem that a transmission information quantity cannot be increased is solved when the frequency band is limited in the transmitter sending a digital signal and much more information is sent within the same frequency band.

Respectfully submitted,

Ralph H. Dougherty
